The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/590,945	Applicant(s) YAMADA, YOUSUKE	
	Examiner HUY T. NGUYEN	Art Unit 2621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1,3,4,10,12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Ikeda et al (6,681,363).

Regarding claim 1, Ikeda discloses an information recording/playback apparatus (Fig. 1, Abstract, column 5, lines 4-62) that records/replays data on/from a recording medium, the apparatus comprising:

determination means for determining before data recording/playback is started whether the data correspond to data to be recorded/replayed in real time or data to be recorded/replayed with accuracy; and

control means for deciding a process to be executed upon error occurrence during the data recording/playback based on a determination result obtained by the determination means.

Method claim 10 corresponds to apparatus claim 1. Therefore method claim 10 is rejected by the same reason as applied to apparatus claim 1.

Regarding claims 3 and 12, Ikeda further teaches the information recording/playback apparatus as claimed in claim 1 or 2, wherein the data to be recorded/replayed in real time are video data (column 2, lines 10-15, column 6, lines 1-25).

Regarding claims 4 and 13, Ikeda further teaches the video data are data compressed according to a moving image compression standard (column 2, lines 10-15, column 6, lines 1-25).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 2, 5, 11 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ikeda et al in view of Kawada et al (7,120,251).

Regarding claims 2, 5, 11 and 14, Ikeda does not teach using predetermined information to detect the data is real time data.

Kawada teaches using predetermine information for real time data (Fig. 12, column 21, lines 35-40). It would have been obvious to one of ordinary skill in the art to modify Ikeda with Kawada by using predetermined information with the data to identify that the data is real time data therefore accurately access the data.

5. Claims 6- 9 and 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ikeda et al in view of Kawashima et al (20020064379 A1).

Regarding claims 6-9 and 15-18, Ikeda does not teach retry operation for correcting the errors in the data.

Kawashima teaches means for correcting the errors in recording and reproducing data by retry operations (paragraphs 0122-0123, Fig. 13).

It would have been obvious to one of ordinary skill in the art to modify Ikeda with Kawashima by providing the apparatus of Ikeda with a retrying operation means as taught by Kawashima for correcting the errors in the data thereby enhancing the capacity of the apparatus of Ikeda.
